

Graylock Digital: Home Builder Simplified Funnel Page

Replit Build Specification Document

1. Overview and Objectives

This document provides the complete build specification for the Graylock Digital Home Builder simplified funnel page (Concept 1). This is a single-page funnel designed to convert paid Google Ads traffic into booked 15-minute strategy calls. It relies on a strong “Free Custom Demo” offer combined with a “Waived Setup Fee for May” urgency hook.

Key Directives for Replit Team:

- **Mobile-First:** The page must be flawlessly responsive. The primary audience will likely view this on mobile devices.
- **No Navigation:** Remove all header navigation links and footer links. The only clickable elements should be the CTA buttons that anchor to the calendar embed.
- **Brand Alignment:** The design must match the existing Graylock Digital brand identity (colors, typography, UI patterns).

2. Global Design System (Brand Tokens)

Typography

- **Primary Font:** `Inter` (Google Fonts)
- **Weights:** 400 (Regular), 500 (Medium), 600 (Semi-Bold), 700 (Bold), 800 (Extra-Bold)

Color Palette

- **Primary Background (Dark Theme):** #0f1e35 (Navy Blue)
- **Primary Text (on Dark):** #ffffff
- **Secondary Text (on Dark):** #a0aec0 (Light Gray)
- **Brand Accent (Orange):** #E85D26
- **Primary Button (Blue):** #2e7bb4
- **Button Hover:** #246290
- **Section Background (Light):** #f7fafc or #ffffff
- **Text (on Light):** #1a202c

UI Elements

- **Buttons:** Rounded corners (e.g., border-radius: 8px), bold text, clear hover states.
 - **Containers:** Use subtle drop shadows on light backgrounds to create depth.
-

3. Page Architecture & Copywriting

The page consists of 5 distinct vertical sections.

Section 1: The Urgency Banner (Sticky Top)

A thin, high-contrast banner fixed to the top of the viewport.

- **Background:** #E85D26 (Brand Orange)
- **Text Color:** #ffffff
- **Copy:** “May Only: \$999 Setup Fee Waived — Offer Ends May 31.”
- **Behavior:** Sticky on scroll.

Section 2: The Hero Section

This is the most critical section. It must communicate the offer immediately.

- **Background:** Dark Theme (#0f1e35)
- **Layout:** Two-column on desktop (Text left, Image right), stacked on mobile.
- **Pre-Headline (Small, uppercase, accent color):** ATTENTION CUSTOM HOME BUILDERS
- **Main Headline (H1, Bold, White):** We'll Design a Custom Homepage for Your Home Building Business — Free, Before You Spend a Dollar.
- **Sub-Headline (H2/Large Paragraph, Light Gray):** Stop losing high-end bids to competitors with better websites. Book a 15-minute demo and we'll show you exactly what a conversion-focused website should look like for your business.
- **Urgency Hook (Bold, White or Accent):** Limited May Offer:
999SetupFeeWaived—PayOnly299/Month When Your Build Starts.
- **Primary CTA Button:** “Book Your Free Custom Demo” (Anchors down to the Calendar Section)
- **Hero Image (Right Column):** A high-quality mockup showing a modern, beautiful home builder website displayed on both a desktop monitor and a mobile phone. (Asset to be provided by Graylock).

Section 3: The Problem / Agitation Section

Three punchy statements that name the exact pain points of the target audience.

- **Background:** Light Theme (#f7fafc)
- **Layout:** Three-column grid (desktop), stacked (mobile).
- **Section Headline (H2, Dark Text):** Why Your Current Website is Costing You Jobs
- **Column 1:**
 - *Icon:* A broken link or outdated screen icon.
 - *Headline:* It Looks Like 2012
 - *Copy:* You build million-dollar homes, but your website makes you look like a budget contractor. High-end clients judge your quality by your digital presence.
- **Column 2:**
 - *Icon:* A leaky funnel or downward chart icon.
 - *Headline:* It Doesn't Convert

- *Copy:* Traffic doesn't matter if visitors leave without contacting you. Your site is a digital brochure, not a lead-generation machine.
- **Column 3:**
 - *Icon:* A hidden or invisible icon.
 - *Headline:* It's Invisible on Google
 - *Copy:* When someone searches for "custom home builders near me," your competitors show up first. You are relying entirely on referrals.

Section 4: The Proof (Before & After)

Visual evidence of Graylock's capability.

- **Background:** Dark Theme (#0f1e35)
- **Section Headline (H2, White):** The Graylock Difference
- **Layout:** A side-by-side comparison (or slider) showing a generic, outdated builder website next to a clean, modern Graylock-built site.
- **Caption Left:** "Outdated & Generic"
- **Caption Right:** "Custom & Conversion-Focused"
- *(Note to Graylock: Provide the best before/after images available, ideally in the construction/trades niche).*

Section 5: The Calendar / Booking Section (The Conversion Point)

This is where the user takes action.

- **Background:** Light Theme (#ffffff)
- **Section Headline (H2, Dark Text):** Claim Your Free Custom Homepage Demo
- **Sub-Headline:** Pick a time below for a brief 15-minute discovery call. We'll learn about your business and start designing your free custom homepage concept.
- **Urgency Reminder (Bold, Red/Orange text):** *Reminder: Book before May 31 to lock in the \$0 setup fee.*
- **Embed Area:** Embed the Calendly (or Cal.com) widget directly here. Ensure the embed is fully responsive and does not require horizontal scrolling on mobile.
- **Trust Signals (Below the calendar):**

- ✓ 7–10 Day Delivery
 - ✓ 100% U.S.-Based Team
 - ✓ No Long-Term Contracts
-

4. Technical Requirements

1. **Framework:** React/Next.js or standard HTML/CSS/JS depending on the Replit stack, but it must be fast and lightweight.
2. **Responsiveness:** Must test perfectly on iOS Safari and Android Chrome. The calendar embed specifically must be usable on small screens.
3. **SEO/Meta Tags:**
 - **Title:** Custom Websites for Home Builders | Graylock Digital
 - **Description:** Stop losing bids to bad design. Get a free custom homepage demo for your home building business. No commitment required.
4. **Analytics:** Ensure Google Analytics and Google Ads conversion tracking tags can be easily injected into the `<head>` of the page. The conversion event should trigger upon successful calendar booking.
5. **Performance:** Optimize image assets (WebP format) to ensure fast load times, critical for paid ad traffic.
